low test, short weight, alum, or phosphate powders. Sold only in cans. ROYAL EARING POWDER Co., 106 Wall Street, N. Y Whatever we decide to do, or not to do, it must be taken for granted that there is no institution so venerable that it can escape the necessity of justifying its existence. In this age investigations are searching. They go to the roots of things. Nothing can maintain itself merely by preving that it has stood a long time. Mr. Highton announces with dogmatic emphasis: "Men who talk of abolishing triat by jury should be sent to Napa. We must adhere to one of the grandest yet Mr. Bighten knows that our sys- their fellow townsman,-Citizen. tem of jury trial is not a work of any old lawmaker, and that the assembly of witnesses gathering together to compare notes about an incident of their personal knewledge, which constatuted the original jury, was as thisferent from the present body of conthe facts in dispute, as well as of ally to succeed it.

The truth is that the jury system tive beginnings. That development is not ended yet, and it may have to be carried considerably further before the institution will be in barmony with our age, as it kept itself unconsciously in harmony with past ages before the prevalence of law books came in to petrify it.

Sliver Lead Mines.

Silver Ulty, N. M. correspondent Globe Domograt.)

At Hachita the American mine continues to produce lead in considerable quantities, and work has recently been ommenced there on the Wasp name, by R. Anderson and W. R. Smith, who Prof. A. LOISETTE, 237 Finh Ave., N. Y. ave leased and bonded the mne. This is considered a good property and will materially increase the lead output of the Hackita district. The Q Cincinnati mine, in the Tres Hermanos district, is also producing lead in small of antities. The Flower Queen mine, in the Cook's Peak district, shows a good body of ore, but the percentage of zinc in the ore is about the same as the lead, so that it is not as desirable an ore for the smelters to handle as ore having A less percentage of zinc. There are quite a number of parts of Grant county, but the only one from which there is a probability the Huston and Thomas claims at Pinos Altos. Here the surface indications are very good, but until recently no development work of importance had been done there. The owners hold the property at \$150,000. and are confident that they have the largest lead property in Southwestern New Mexico. Developments may prove that there is lead amongh in these mines at Pinos Altos to keep a large smelter plant going for a long time, as the Kelly mine near Secorro did. The lead question is all-important at present.

W. H. H. Clark, of St. Louis, has found a means of purifying water which is only novel as to the mode of preparing the purifier. He simply water upon it. Only one drep is necessary for a gollon of water. A teaspoonful will clear a barrel of water, matter to the bottom. Mr. Clark thinks that the water in reservoirs could be thus cleared and settled at the cost of twenty-live cents for every Thors is a large problem for the million gallons pravided the alum is churches in this declaration of Cardidissolved in hot water. Alum has long und Manning: "There are 4,000,000 of been used as a purifier of water, but living and dving and dead souls in unable to say .- Tueson Citizen.
